Project Design Phase-I

SOLUTION ARCHITECTURE

Date	01 October 2022
Team ID	PNT2022TMID26387
Project Name	Project – Estimate The Crop Yield Using
	Data Analytics

Design

Design the visualizations with the help of available data with maximum details

Availability

Available for everyone. Visible and usable for all the users

Usability

Visualization are created and saved then these visualizations are used

Reliable

Creating interactive dashboard which is easy to understand and use

Functional

User can get all the details about the Cultivatable land and crop yield prediction
